2021

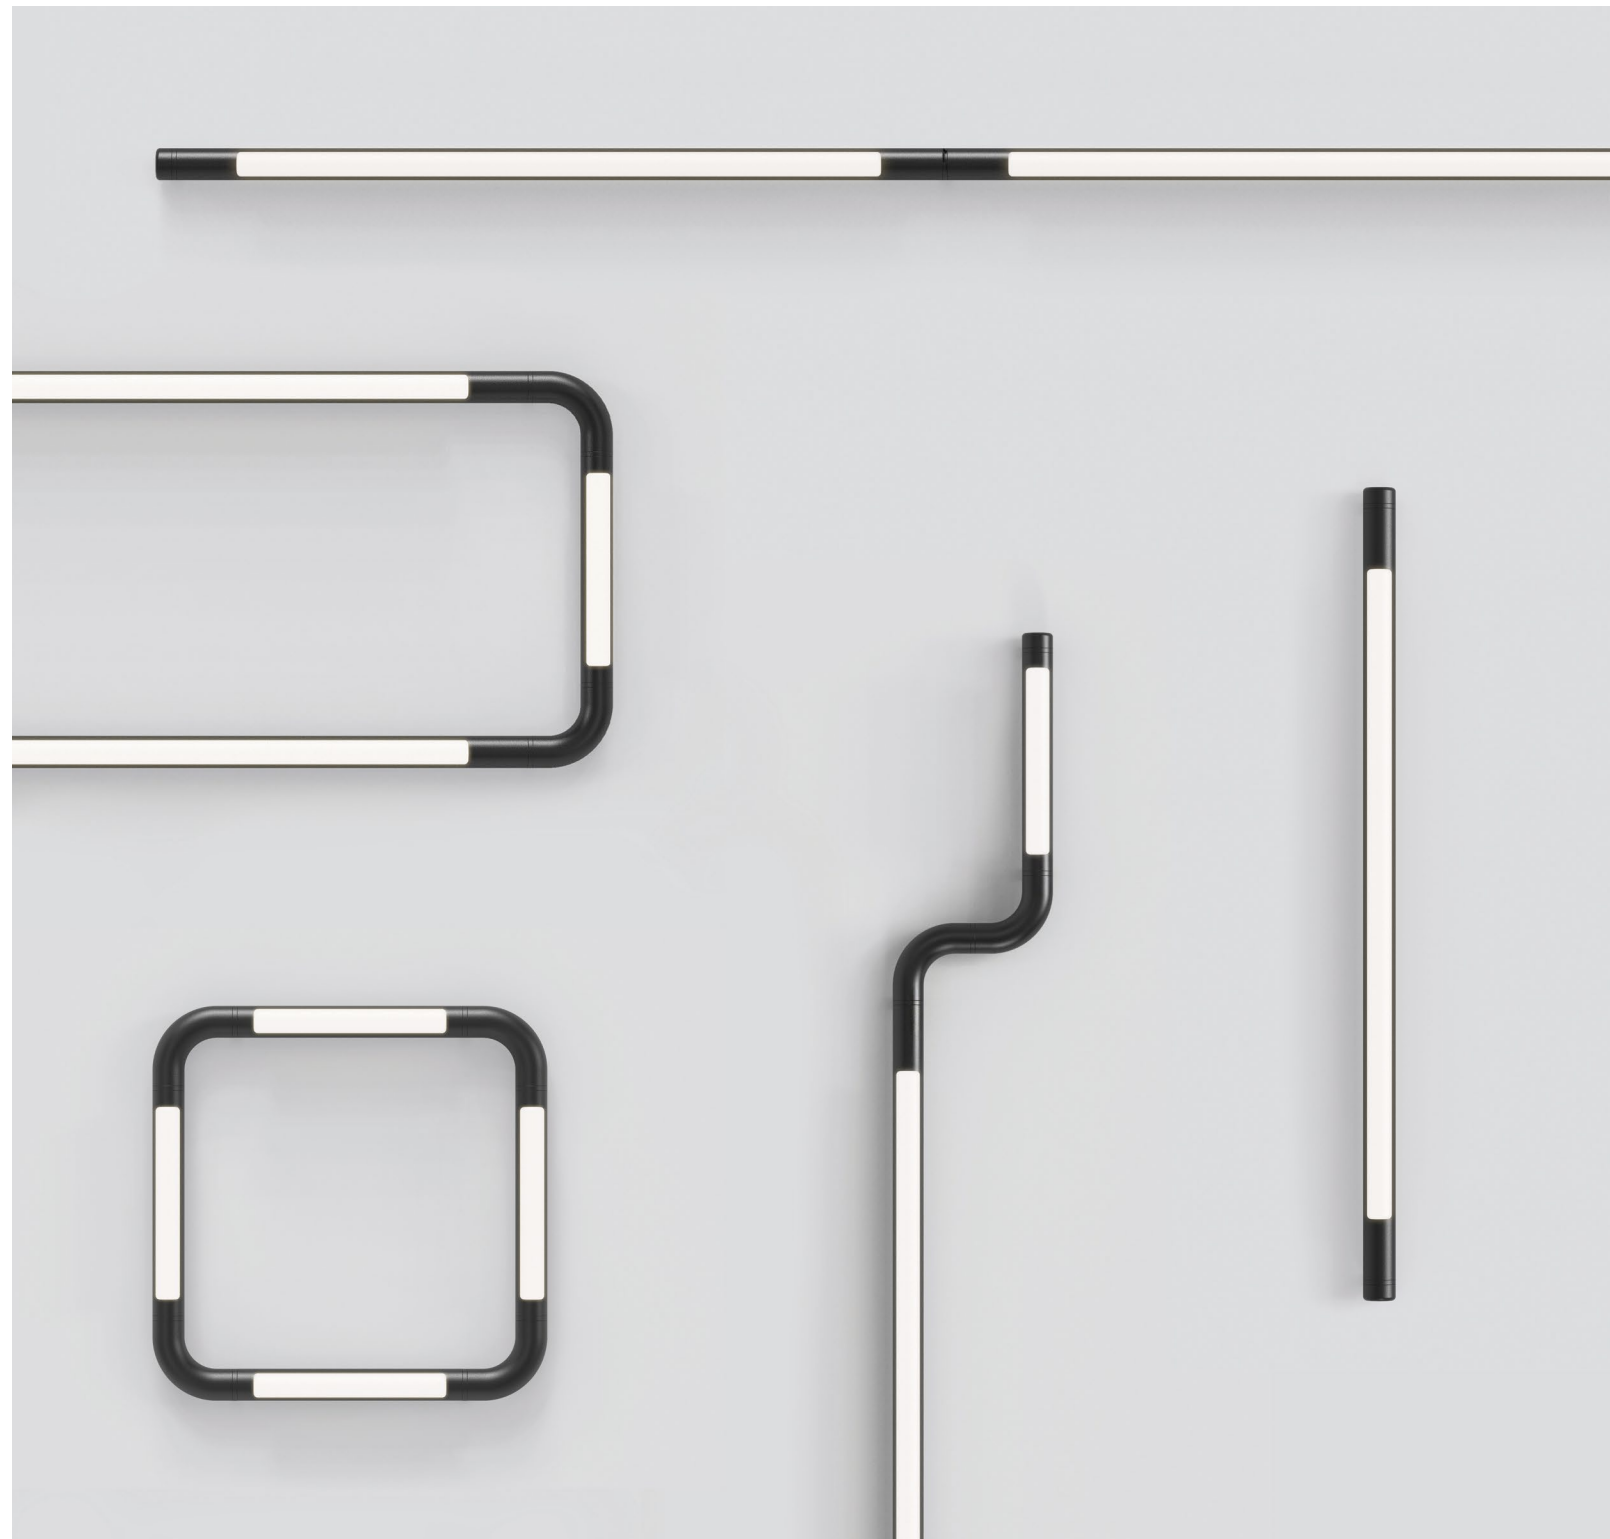

## About the Pipeline Ceiling/Wall

---

Designed to serve and enhance architectural spaces, the Pipeline Ceiling/Wall provides accent lighting while becoming an integral element of the space itself. As a surface mounted luminaire, its space efficiency meets the technical specifications of tighter spaces: lower ceiling, corners and corridors, or the need for wall mounted light.

The Pipeline Ceiling/Wall is a new take on the original Pipeline series. The series' backbone is a singular linear light section, available in two different lengths, which can be arranged individually, sequentially or connected in a mix of sizes and connecting styles.

The ingenuity of the components of the Pipeline series enable it to follow the contours of any given space, and discreetly present itself as an intrinsic component of the architecture. The collection proposes a series of standard arrangements but can be further configured into customized arrangements to suit any space.

“

Much like a brushstroke  
on a blank canvas,  
the Pipeline Ceiling/  
Wall draws light on  
architectural spaces.

—Caine Heintzman, Designer

## About the Studio

“We like to consider adaptability in all aspects of a design. We work hard to develop luminaires that offer diversity in form and finish in order to fulfill the widest range of applications. We believe that elements of flexibility can improve the quality of a product.”

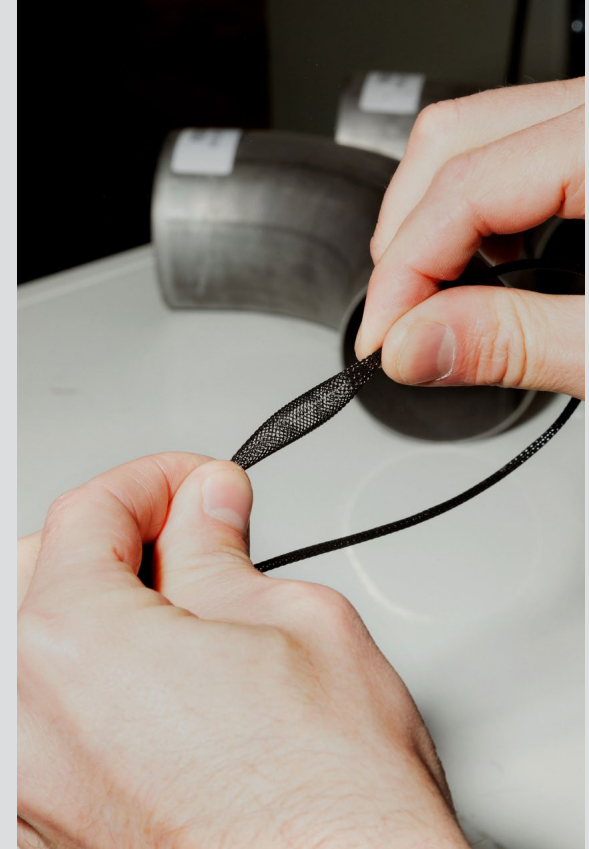

—Matt Davis, Co-founder & Owner

---

### **ANDlight, decorative luminaire design and manufacturer.**

Born from a desire to produce functional lighting, luminaire design and manufacturer ANDlight aims to create honest products. With an authentic approach to the design process, the production, and the way of conducting business, ANDlight has established itself as a brand with substance since its launch in 2014. It proposes approachable products that are timeless in form and reliability, refined in aesthetics, with an astutely applied touch of playfulness.

ANDlight’s luminaires are designed, built and assembled in their native Vancouver, Canada.

# About the Designer

---

## Caine Heintzman

Trained in industrial design at Emily Carr University of Art + Design, and Kunsthochschule Berlin Weissensee, Caine developed an early interest for lighting. Following this inclination, his career path gravitated towards the industry and led him to design award winning luminaires.

Caine's command of lighting technicalities and deep historical knowledge bring substance to his vision. Paired with an awareness of the field, its sources and its many forms, he continues to explore and innovate through his designs.
